Appln. No.: 10/524,477

Amendment Dated January 24, 2006

Reply to Office Action of November 2, 2005

## **Remarks/Arguments:**

Claims 1 and 4-9 are pending in this application. Claims 1, 4-6 and 8 are allowed. Claims 7 and 9 are rejected, but have been amended in this Response.

Claims 9 stands rejected under 35 U.S.C. § 112, first paragraph. Claims 7 and 9 are rejected under 35 U.S.C. § 112, second paragraph. Applicant has amended claims 7 and 9 to overcome these rejections. As suggested by the Examiner, claim 7 has been amended to clarify that the processing aid is graphite. The Examiner also suggested that claim 7 be amended to depend from claim 4, however, Applicant notes that claim 7 already depends from claim 4, as indicated in Applicant's Preliminary Amendment filed with the application. Claim 9 has been amended to more specifically recite specific reactions for which the process may be performed. Support for this amendment may be found, for example, in the originally filed application at page 1, second paragraph. No new matter has been added. Applicant asserts that one skilled in the art would know the reactants, products and reaction conditions for the recited reactions, without undue experimentation, and that claim 9, as amended, sets forth clear metes and bounds of the claimed subject matter. Further, Applicant notes that all of the recited processes employ copper catalysts and potentially suffer from the chloride poison alleviated by the claimed process.

Therefore, it is respectfully submitted that amended claims 7 and 9 in the aboveidentified application are in condition for allowance and notice to that effect is earnestly solicited.

Respectfully submitted,

Christopher R. Lewis, Reg. No. 36,201

James C. Abruzzo, Reg. No. 55,890
